IN THE UNITED STATES DISTRICT COURT
FOR THE NORTHERN DISTRICT OF CALIFORNIA
(SAN FRANCISCO DIVISION)

IN RE: BEXTRA AND CELEBREX
MARKETING SALES PRACTICES AND
PRODUCT LIABILITY LITIGATION

MDL No. 1699

ENID R. FARKAS,
Plaintiffs,

v.

PFIZER, INC., PHARMACIA
CORPORATION, and G.D. SEARLE LLC,
(FKA G.D. SEARLE & CO.),
Defendants.

C 07 2724
Case No.

CIVIL COMPLAINT

CRB

JURY TRIAL DEMANDED

ENID R. FARKAS, Plaintiff, by and through her undersigned counsel, brings this action for damages against Defendants PFIZER, INC., PHARMACIA CORPORATION, and G.D. SEARLE LLC, (FKA G.D. SEARLE & CO.) (hereafter "Defendants") for damages arising from Defendants' design, manufacture, sale, testing, marketing, advertising, promotion, and/or distribution of the unsafe prescription anti-inflammatory drug Celebcoxib, trade name CELEBREX® ("CELEBREX").

1 **I. PARTIES**

2 1. Plaintiff was at all relevant times, married and adult resident citizen of the
3 State of Florida, residing in Tamarac, Florida. (Unless otherwise specified herein, the term
4 “Plaintiff” as used in the singular refers to, Plaintiff, Enid R. Farkas)

5 2. Defendant PFIZER, INC. (“PFIZER”) is a Delaware corporation with its
6 principal place of business in New York, New York. On July 16, 2002 PFIZER announced its
7 proposed acquisition of PHARMACIA CORPORATION (“PHARMACIA”). On April 16, 2003,
8 PFIZER completed its \$60 billion acquisition of PHARMACIA. As a wholly-owned subsidiary
9 of PFIZER, PHARMACIA acted in all aspects as PFIZER’s agent and alter ego. At all relevant
10 times, PFIZER and/or its predecessors in interest were engaged in the business of designing,
11 testing, manufacturing, packaging, marketing, distributing, promoting, and selling the drug
12 Celecoxib, under the trade name CELEBREX in Puerto Rico and throughout the United States.

13 3. Defendant G.D. SEARLE LLC, (FKA G.D. SEARLE & CO.)
14 (“SEARLE”) is a Delaware corporation with its principal place of business in Illinois. In April
15 2000 SEARLE was acquired by PHARMACIA, and became a wholly-owned subsidiary of
16 PHARMACIA. At the time of PFIZER’s acquisition of PHARMACIA, SEARLE was a wholly-
17 owned subsidiary of PHARMACIA, acting as its agent and alter ego in all matters alleged in this
18 Complaint, and is now a wholly-owned subsidiary of PFIZER. At all relevant times, SEARLE
19 has been engaged in the business of designing, testing, manufacturing, packaging, marketing,
20 distributing, promoting, and selling the drug Celecoxib, under the trade name CELEBREX in
21 Puerto Rico and California and throughout the United States.

22 4. Defendant PHARMACIA is a Delaware corporation with its principal
23 place of business in New Jersey. PHARMACIA was created in April 2000 through the merger of
24 Pharmacia & Upjohn with Monsanto Company and its G.D. SEARLE unit. PHARMACIA is
25 now a wholly-owned subsidiary of PFIZER. At all relevant times, PHARMACIA, and its
26 predecessors in interest have been engaged in the business of designing, testing, manufacturing,
27 packaging, marketing, distributing, promoting, and selling the drug Celecoxib, under the trade
28

1 name CELEBREX in Puerto Rico and California and throughout the United States.

2 5. Celecoxib was developed in 1998 by SEARLE and marketed jointly by
3 SEARLE and PFIZER under the brand name CELEBREX. SEARLE was acquired by
4 PHARMACIA, which was then acquired by PFIZER, in part so that PFIZER could take full
5 control of CELEBREX.

6 6. At all times relevant to this action, Defendants intentionally, recklessly
7 and/or negligently concealed, suppressed, omitted, and misrepresented the risks, dangers, defects,
8 and disadvantages of CELEBREX, and advertised, promoted, marketed, sold and distributed
9 CELEBREX as a safe prescription medication when, in fact, Defendants had reason to know, and
10 did know, that CELEBREX was not safe for its intended purposes, for the patients for whom it
11 was prescribed, and for whom it was sold; and that CELEBREX caused serious medical
12 problems, and in certain patients, catastrophic injuries and deaths.

13 7. In engaging in the conduct alleged herein, each Defendant acted as the
14 agent for each of the other Defendants, or those Defendant's predecessors in interest.

15 **II. JURISDICTION AND VENUE**

16 8. This Court has subject matter jurisdiction over this matter pursuant to
17 28 U.S.C.A. § 1332 (diversity jurisdiction). The amount in controversy exceeds \$75,000.00 and
18 there is complete diversity of citizenship between Plaintiff and Defendants.

19 9. Venue is proper in this District pursuant to 28 U.S.C.A. § 1391.
20 Defendants marketed, advertised and distributed the dangerous product in this district, thereby
21 receiving substantial financial benefit and profits from sales of the dangerous product in this
22 district, and reside in this district under 28 U.S.C.A. § 1391(c), such that venue is proper.

23 10. At all relevant times herein, Defendants were in the business of designing,
24 manufacturing, marketing, developing, testing, labeling, promoting, distributing, warranting and
25 selling their product, CELEBREX. Defendants at all times relevant hereto designed, developed,
26 manufactured, promoted, marketed, distributed, tested, warranted and sold in interstate commerce
27 (including Puerto Rico and California) the aforementioned prescription drug. Defendants do
28

1 substantial business in the States of Puerto Rico and California and within this District, advertise
2 in this district, receive substantial compensation and profits from sales of CELEBREX in this
3 District, and made material omissions and misrepresentations and breaches of warranties in this
4 District so as to subject them to *in personam* jurisdiction in this District. In engaging in the
5 conduct alleged herein, each Defendant acted as the agent for each of the other Defendants or
6 those Defendant's predecessors in interest.

7 **III. INTERDISTRICT ASSIGNMENT**

8 11. Assignment to the Northern District of California, San Francisco Division,
9 is proper pursuant to MDL-1699, Pretrial Order No. 2 dated December 13, 2005, as this action is
10 related to *In Re: Bextra and CELEBREX Marketing Sales Prac. and Pro. Liab. Lit.*, MDL-1699,
11 assigned to the Honorable Charles R. Breyer by the Judicial Panel on Multidistrict Litigation on
12 September 6, 2005.

13 **IV. FACTUAL BACKGROUND**

14 **A. Facts Regarding Plaintiff**

15 12. Plaintiff was prescribed and began taking CELEBREX daily in or about
16 February 2001 for a period of approximately four (4) years.

17 13. As a direct and proximate result of using CELEBREX, Plaintiff suffered
18 severe cardiovascular injuries. Specifically, on December 7, 2004, Plaintiff suffered myocardial
19 infarction (heart attack), which has caused and will continue to cause Plaintiff damages and
20 places her at risk of further serious injury or death.

21 14. Unaware of the risks presented by CELEBREX, Plaintiff continued to take
22 CELEBREX until the day of her heart attack, after which time she was instructed to stop all
23 medication, including CELEBREX.

24 15. Plaintiff and Plaintiff's healthcare providers were at the time of Plaintiff's
25 heart attack and initial injury unaware—and could not have reasonably known or have learned
26 through reasonable diligence—that such injury directly resulted from Plaintiff's ingestion of
27 CELEBREX and Defendants' negligent and otherwise culpable acts, omissions, and
28

1 misrepresentations.

2 16. Plaintiff used CELEBREX in a proper and reasonably foreseeable manner
3 and used it in a condition that was substantially the same as the condition in which it was
4 manufactured and sold.

5 17. Plaintiff would not have purchased and used CELEBREX had Defendants
6 properly disclosed the risks associated with the drug, and through diligent effort was not able to
7 discover the risk from CELEBREX prior to her use of the drug.

8 **B. Facts Regarding CELEBREX: Science And Other Cox-2 Inhibitors**

9 18. CELEBREX is among a class of pain medications called non-steroidal
10 anti-inflammatory drugs ("NSAIDs"). Aspirin, naproxed (trade name Aleve[®]), and ibuprofen
11 (trade name Advil[®]) are examples of well-known NSAIDs.

12 19. NSAIDs reduce pain and inflammation by blocking the body's production
13 of pain transmission enzymes called cyclooxygenase, COX-1 and COX-2. COX enzymes trigger
14 the sequential oxidation of various fatty acids to create prostaglandins. Prostaglandins are
15 important cogs in the physiology of pain, igniting hormone-like actions in the immediate vicinity
16 of the cells that release them, thereby inducing inflammation, pain, and fever.

17 20. Because COX enzymes and prostaglandins increase the pain associated
18 with tissue injury, the synthesis of prostaglandins by cells of injured tissue becomes a reasonable
19 target for pain-management drugs.

20 21. Traditional NSAIDs like aspirin, ibuprofen and naproxen inhibit both
21 COX-1 and COX-2 enzymes simultaneously, providing relief from inflammation and pain, but at
22 the cost of potential adverse gastrointestinal effects, as the prostaglandins that are supported by
23 COX-1 enzymes are involved in the production of gastric mucus which protects the stomach wall
24 from the hydrochloric acid present in the stomach. By blocking the COX-1 enzyme, the body's
25 ability to protect gastric tissue is hampered and, as a result, can cause harmful gastrointestinal
26 side effects, including stomach ulceration and bleeding.

27 22. Defendants and other pharmaceutical companies set out to remedy these
28

1 gastrointestinal side effects suffered by some NSAID users by developing “selective” inhibitors,
2 called coxibs, which targeted only COX-2 production, thus (allegedly) allowing for proper
3 maintenance of gastric tissue while still reducing inflammation. Their development was based on
4 the hypothesis that COX-2 was the source of prostaglandins E2 and I2, which mediate
5 inflammation, and that COX-1 was the source of the same prostaglandins in the stomach lining.
6 By not inhibiting COX-1, whose products provide cytoprotection in the gastric epithelium, these
7 coxibs were thought to decrease the incidence of gastric side effects when compared to traditional
8 NSAIDS that inhibit both COX-1 and COX-2.

9
10 23. In making this decision, however, Defendants and their predecessors in
11 interest either intentionally ignored and/or recklessly disregarded current medical knowledge that
12 selective COX-2 inhibition lowers prostaglandin I2 levels, the predominant COX-2 product
13 responsible for preventing platelet aggregation and clotting, while leaving thromboxane A2, the
14 potent COX-1 platelet aggregator and vasoconstrictor, unaffected. By selectively inhibiting
15 prostaglandin I2 without similarly suppressing its COX-1 counterpart, CELEBREX and other
16 coxibs expose their users to a host of clot-related cardiovascular risks, including heart attack,
17 heart attack, and unstable angina.

18 24. On June 29, 1998, SEARLE and PFIZER filed for FDA approval of
19 Celecoxib, its first major COX-2 inhibitor drug, under the trade name CELEBREX. The FDA
20 granted preliminary approval of the new drug on December 31, 1998 for the relief of signs and
21 symptoms of adult osteoarthritis and rheumatoid arthritis. A year later, on December 23, 1999,
22 the FDA granted accelerated approval of CELEBREX for a second indication; the reduction of
23 intestinal polyps as an adjunct to endoscopy and surgery in patients with familial adenomatous
24 polyposis (FAP), a rare genetic disorder.

25 25. In late January 1999, following FDA approval, PFIZER publicly launched
26 CELEBREX, their new “blockbuster” drug, in one of the largest direct-to-consumer marketing
27 campaigns ever undertaken for prescription drugs. PFIZER’s massive marketing campaign
28 fraudulently and misleadingly depicted CELEBREX as a much safer and more effective pain

1 reliever than less inexpensive traditional NSAIDs. Defendants and their representatives and
2 agents misrepresented the safety profile of CELEBREX to consumers, the medical community,
3 healthcare providers, and third party payors.

4 **C. Facts Regarding Celebrex's Safety And Defendants' Knowledge Thereof**

5 26. The potential for cardiovascular risk of selective COX-2 inhibitors was
6 known to Defendants long before the FDA granted market approval in December 1998. By 1997,
7 and prior to the submission of the New Drug Application (the "NDA") for CELEBREX,
8 Defendants were aware that, by selectively inhibiting only the COX-2 enzyme, CELEBREX
9 altered the homeostatic balance between prostacyclin synthesis and thromboxane and thereby
10 increased the prothrombotic effects of the drugs, causing blood clots to form in those who
11 ingested it. *See* Topol, E.J., *et al.*, "Risk of Cardiovascular Events Associated with Selective Cox-
12 2 Inhibitors," JAMA, August 22, 2001 at 954.

13 27. Pharmacologist Dr. Garrett Fitzgerald of the University of Pennsylvania
14 reported in an editorial published in *The New England Journal of Medicine* on October 21, 2004,
15 that contemporaneous with Defendants' launch it was known that selective COX-2 inhibitors,
16 such as CELEBREX, suppressed the formation of prostaglandin I-2 in healthy volunteers,
17 inhibited platelet aggregation in vitro, and may predispose patients to myocardial infarction or
18 thrombotic heart attack. Fitzgerald, G.A., Patrono C., "The Coxibs, Selective Inhibitors of
19 Cyclooxygenase-2," N Engl J Med 2001;345:433-442.

20 28. Early FDA updates in March and April of 1999 similarly acknowledged
21 this known risk, but noted, based upon PFIZER's representations, that CELEBREX "does not
22 affect platelet aggregation (clumping), an important part of the blood clotting process." *See* FDA
23 Updates, "New Arthritis Drug May Have Fewer Side Effects," FDA Consumer March-April
24 1999.

25 29. Based on the studies performed on CELEBREX, other COX-2 inhibitors,
26 and basic research on this type of selective inhibitor which had been widely conducted,
27 Defendants knew when CELEBREX was being developed and tested that selective COX-2
28

1 inhibitors posed serious cardiovascular risks for anyone who took them, and presented a specific
2 additional threat to anyone with existing heart disease or cardiovascular risk factors.

3 30. Despite years of studies on selective COX-2 inhibitors, as well as the
4 disturbing new studies specifically analyzing the risks of CELEBREX, Defendants failed to take
5 any action to protect the health and welfare of patients, opting instead to continue promoting the
6 drug for sale even after the FDA's Drug Safety and Risk Management Advisory Committee and
7 Arthritis Drug Advisory Committee meetings.

8 **D. CELEBREX and Cox-2 Studies Did Not Show CELEBREX to be Safe**

9 **1. CELEBREX Long-Term Arthritis Safety Study (CLASS)**

10 31. In September 1998, PHARMACIA sponsored an allegedly independent
11 CELEBREX Long-Term Arthritis Safety Study ("CLASS"). The multicenter, double-blind,
12 parallel group study sought to compare the incidence of clinically significant upper
13 gastrointestinal events between CELEBREX 400 mg BID and Ibuprofen 800 mg. (CLASS data
14 is found in NDA 20-998/S-009 submitted to the FDA by SEARLE on June 12, 2000. CLASS
15 was submitted to the FDA on June 12, 2000 and reviewed by James Witter, M.D., Ph.D. (FDA
16 Medical Officer) on September 20, 2000.)

17 32. On September 13, 2000, Defendants released the results of the CLASS
18 study in the *Journal of American Medicine*. Silverstein, F.E., *et al.*, "Gastrointestinal Toxicity
19 with Celecoxib vs. Nonsteroidal Anti-inflammatory Drugs for Osteoarthritis and Rheumatoid
20 Arthritis: The CLASS Study: A Randomized Controlled Trial," 284 JAMA 1247 (2000).
21 Researchers enthusiastically reported a "lower incidence of symptomatic ulcers and ulcer
22 complications combined, as well as other clinically supported toxic effects, compared with
23 NSAIDs at standard doses."

24 33. Although Defendants touted the CLASS study as the primary evidence to
25 support its theory that CELEBREX was safer for consumers who could not tolerate traditional
26 NSAIDs in their gastrointestinal system, Defendants intentionally, recklessly and/or negligently
27 concealed, suppressed, omitted, and misrepresented the results, risks and defects of the CLASS
28

1 study. Among other things, Defendants failed to release the study's complete twelve month
2 results releasing only the first six months of trials, reported biased and misleading results, limited
3 conclusions to upper gastrointestinal events despite other known risks factors, and understated
4 known cardiovascular risks.

5 34. Despite Defendants' favorable CLASS Study conclusions, no other
6 reviewing or administrative body was able to substantiate those findings. The FDA Medical
7 Officer Review of the CLASS data found CELEBREX to be no more efficacious than other
8 traditional NSAIDS comparators. *See generally*, FDA Medical Officer Review, NDA 20-998/S-
9 009 submitted to the FDA by SEARLE on June 12, 2000. According to the FDA's review of the
10 CLASS data: "Celecoxib did not demonstrate any statistical superiority to NSAIDs (pooled) or
11 either comparator (diclofenac and ibuprofen) with regards to the primary safety endpoint of
12 CSUGIE (Clinically Significant Upper Gastrointestinal Adverse Events) at any point in the trial
13 although there were trends that favored celecoxib." (FDA CLASS Review).

14 35. The FDA Arthritis Advisory Committee similarly found no "clinically
15 meaningful" safety advantage of CELEBREX over older NSAIDs. (FDA CDER Arthritis
16 Advisory Committee, February 7th and 8th, 2001, Gaithersburg, Maryland). The CLASS Study
17 failed to demonstrate a superior safety record over ibuprofen or pooled NSAID data. Based on
18 this information, the Committee advised that further studies be done to assess the risk of COX-2
19 drugs and NSAIDS when taken with aspirin.

20 36. In a June 2002 editorial, the *British Medical Journal* chastised the Study's
21 "misleading" and "seriously biased" nature; noting that the complete results "clearly
22 contradict[ed] the published conclusions," and warning against the dangers of "overoptimistic,"
23 "short-term" data and "post hoc changes to the protocol." Juni, Peter, *et. at.*, "Are Selective COX
24 2 Inhibitors Superior To Traditional Non Steroidal Anti-Inflammatory Drugs?" *BMJ*
25 2002;324:1287-1288. Most noticeably, the CLASS study considered only six months of data
26 despite the fact that researchers at that point had 12 months of data that, when analyzed as a
27 whole, showed no significant difference. Instead of releasing the complete 12-month results
28

1 from CLASS, PFIZER relied on and published only the first six months of data. JAMA 2000,
2 48:1455-1460. The results of the completed study revealed the real truth: CELEBREX offered no
3 gastrointestinal (GI) benefit. Almost all ulcer-related complications that had occurred during the
4 second half of the CLASS trials were in users of CELEBEX. These results clearly contradict the
5 published CLASS conclusions.

6 37. Editors of the Journal of the American Medical Association (JAMA) and
7 other medical experts were reportedly “flabbergasted” when they realized they had been “duped”
8 by only being provided with the first six months of CLASS data. Okie S., “*Missing data on*
9 *Celebrex: Full study altered picture of drug*,” Washington Post 2001 Aug 5;Sect A:11. The
10 *Washington Post* reported JAMA editors noting: “When all of the data were considered, most of
11 CELEBREX’s apparent [GI] safety advantage disappeared.”

12 38. Institutional bias also appeared to play a role in the Study’s biased
13 conclusions. According to the *Washington Post*, all sixteen CLASS authors were either
14 employees of PHARMACIA or paid consultants of the company. Okie, S., “*Missing data on*
15 *Celebrex: Full study altered picture of drug*,” Washington Post 2001 Aug 5;Sect A:11. Moreover,
16 at least one author, Dr. M. Michael Wolfe, a gastroenterologist from Boston University, admits he
17 was duped by PHARMACIA. In the summer of 2000, *The Journal of the American Medical*
18 *Association* asked Wolfe to participate in the “six-month” trial. Wolfe found the study, tracking
19 8,000 patients over a six-month period, persuasive, and penned a favorable review, which helped
20 to drive up CELEBREX sales. It was not until early the next year, while serving on the FDA’s
21 Arthritis Advisory Committee, that Wolfe learned the study had run for one year, not six months,
22 as the company had originally led both Wolfe and the *Journal* to believe. *Id.* Here again, when
23 the complete data was considered, most of CELEBREX advantages disappeared.

24 39. Defendants also limited conclusions of the CLASS study to upper
25 gastrointestinal events, despite other known risks factors, and understated known cardiovascular
26 risks. A metastudy by the Cleveland Clinic published in the Journal of the American Medical
27 Association analyzed data from two major studies, including CLASS, funded by the drug
28

1 companies and two smaller ones—all for cardiovascular risks. Debabrata Mukherjee, *et al.*, “*Risk*
2 *of Cardiovascular Events Associated with Selective Cox-2 Inhibitors*,” 286 JAMA 954 (2001).)

3 The metastudy found that PHARMACIA failed to identify and study cardiovascular risks for their
4 products. The annualized heart attack rates for patients taking Vioxx or Celebrex, the researchers
5 found, were “significantly higher” than those in a group taking placebos. “The available data raise
6 a cautionary flag about the risk of cardiovascular events with Cox-2 inhibitors,” they concluded.

7 40. “A total of 36 deaths occurred during the [CLASS] study or during post
8 study follow-up: 19 in the celecoxib group, 9 in the diclofenac group and 8 in the ibuprofen
9 group Most deaths were cardiovascular in nature.” FDA CLASS Review at 54. The
10 increased number of adverse cardiovascular events in the CELEBREX group was not surprising,
11 as they were also revealed in the original New Drug Application (NDA) submitted for
12 CELEBREX. “In the original NDA, myocardial infarction was noted to occur at a higher rate in
13 celecoxib-treated as compared to placebo treated patients. In the long term trial (Trial 024) that
14 was included in the NDA submission, the predominate (>90%) cause of death for patients taking
15 celecoxib at any dose was cardiovascular.” FDA CLASS Review at 78.

16 41. Public Citizen, a public watchdog organization, also reviewed the CLASS
17 data in its entirety. A complete review reveals the combined anginal adverse events was 1.4% in
18 the CELEBREX group versus 1.0% in either NSAID group. Specifically, the rate of heart attack
19 in the CELEBREX was double that of the other two NSAIDs, 0.2% vs. 0.1%, respectively.

20 42. Eric Topol of the Cleveland Clinic reached a similar conclusion, noting that
21 the CLASS trial MI rate was 1.6% in CELEBREX group (at a dosage of 400 mg twice a day) and
22 1.2% in the ibuprofen group for the 1739 patients taking low-dose aspirin. Topol noted that this
23 numerical excess, albeit not statistically significant, was also found in the 6229 patients not
24 taking aspirin in the trial. Eric J. Topol, “*Arthritis Medicines and Cardiovascular Events –*
25 *House of Coxibs*,” JAMA 293:366. Based on this data, Topol and his colleagues concluded: “It
26 is mandatory to conduct a trial specifically assessing cardiovascular morbidity.” *Id.*

27 Unfortunately, no such trials were ever initiated, delaying the official warnings of CELEBREX
28

1 and jeopardizing countless lives in the process.

2 43. The CLASS data proves that PFIZER knew that its first generation COX-2
3 inhibitor, CELEBREX, caused a disproportionately and statistically significant high number of
4 adverse cardiovascular events before it was introduced to the market in January 1999. According
5 to Public Citizen, after CLASS, the FDA recommended a trial to specifically assess the
6 cardiovascular risks of COX-2 inhibitors. The Adenoma Prevention with Celecoxib (APC) trial
7 was intended to be this placebo-controlled trial of CELEBREX.

8 **2. APC Trial**

9 44. In early 2000, the National Cancer Institute (NCI), in collaboration with
10 SEARLE and PFIZER, initiated the Adenoma Prevention with Celecoxib (APC) trial, a
11 randomized, double-blind, placebo-controlled study to discover the efficacy of CELEBREX in
12 preventing the growth of pre-cancerous colon polyps. N.ENG. J. MED. 352;11 at 1072. The trial
13 involved 2026 patients across the country with randomization to one of three groups: (1) placebo;
14 (2) 200 mg CELEBREX twice daily; and (3) 400 mg CELEBREX twice daily. The patients, each
15 of whom had an adenomatous polyp removed before enrollment, were followed up for a mean of
16 33 months while taking the study drug, with the primary objective of limiting the development of
17 colorectal cancer.

18 45. On December 17, 2004, the National Cancer Institute suspended the use of
19 CELEBREX for all participants in the APC trial due to "significant excess of cardiovascular
20 death, myocardial infarction (MI) and heart attack." Eric J. Topol, "*Arthritis Medicines and*
21 *Cardiovascular Events – House of Coxibs*," JAMA 293:366. Analysis by an independent Data
22 Safety Monitoring Board (DSMB) showed a two to three fold increased risk of major fatal and
23 non-fatal cardiovascular events for participants taking the drug compared to those on a placebo
24 with a secondary dose-response effect.

25 46. The absolute excess of major cardiovascular events of 13/1000 patients at
26 the 800 mg dose (400 mg 2x day) was strikingly similar to the results of trials with rofecoxib and
27 valdecoxib, both selective NSAID COX-2 inhibitors removed for the market for their significant
28

1 cardiovascular risks. Eric J. Topol, "*Arthritis Medicines and Cardiovascular Events – House of*
2 *Coxibs*," JAMA 293:366.

3 47. The FDA reported similar results, noting:

4 In the National Cancer Institute's Adenoma Prevention with
5 Celecoxib (APC) trial in patients at risk for recurrent colon
6 polyps, a 2-3 fold increased risk of serious adverse CV
7 events was seen for CELEBREX compared to placebo after
8 a mean duration of treatment of 33 months. There appeared
9 to be a dose response relationship, with a hazard ratio of 2.5
for CELEBREX 200 mg twice daily and 3.4 CELEBREX
400 mg twice daily for the composite endpoint of death
from CV causes, myocardial infarction (MI), or heart attack.

10 April 7, 2005 FDA Alert: www.fda.gov/cder/drug/infopage/celebrex/celebrex-hcp.htm.

11 48. The dosage noted in the study is itself important for two reasons: first,
12 there appears to be an association between dosage and the increase in adverse cardiovascular
13 events; second, most patients increase dosage. PFIZER knew patients were increasing their
14 dosages as noted in the CLASS Study: "Interestingly ... up to 70% of patients increased their dose
15 for celecoxib." FDA CLASS Review at 74. Thus, PFIZER was aware of "dosage creep."

16 **3. Other CELEBREX Trials**

17 49. Several other CELEBREX trials also gave Defendants insight into the
18 cardiovascular risks esented by CELEBREX. The Prevention of Spontaneous Adenomatous
19 Polyps (PreSAP) trial identified the death rate from cardiovascular causes (heart attack, heart
20 attack, heart failure, angina, or need for CV procedure) as 3.6% with CELEBREX as compared to
21 2.7% for placebo.

22 50. Public Citizen also reviewed the results of Study IQ IQ5-97-02-001 which
23 reflected "the combined rate of all serious cardiovascular adverse events in patients getting a
24 placebo was 2.1% but was greatly increased in those getting celecoxib to 7.7%, a 3.6 fold
25 increase in CV risk in those people taking celecoxib. (p=0.03)." *Public Citizen*, January 26,
26 2005, Dr. Sidney M. Wolfe. According to Dr. Sidney Wolfe, "The study revealed a significantly
27 increased rate (3.6-fold) of serious CV adverse events and more than a doubling in the rate of CV
28 deaths in people using celecoxib compared to those using placebo." *Id.*

1 **4. Cox-2 Studies: VIGOR and APPROVe**

2 51. PFIZER also had access to other data which indicated a cardiovascular risk
3 with its drugs. Specifically, PFIZER had knowledge of two studies conducted by Merck related
4 to its Cox-2 inhibitor Vioxx – Vioxx Gastrointestinal Outcomes Research (VIGOR) and
5 Adenomatous Polyp Prevention (APPROVe).

6 **b. VIGOR**

7 52. In 2000, The FDA Medical Officer Review of CLASS specifically noted
8 the VIGOR trial and the concern over serious adverse cardiovascular events. FDA CLASS
9 Review at 78.

10 53. According to VIGOR (near acronym for Vioxx Gastrointestinal Outcomes
11 Research) Vioxx patients experienced 20% more serious clinical adverse events (statistically
12 significant); they experienced 4.6 times more hypertension events serious enough to warrant
13 discontinuation, 1.7 times more edema events, and 1.85 times as many congestive heart failure
14 adverse events. By two measures of cardiovascular events related to blood clots, Vioxx had twice
15 the risk of naproxen and the results were considered statistically significant.

16 54. The VIGOR study comprised the most definitive scientific evidence ever
17 obtained about pharmaceutical products. It was a large, randomized clinical trial, the gold
18 standard of medical research. It was a safety study with endpoints set in advance. As Merck
19 stated many times, it was designed to provide definite proof of safety, convincing enough to
20 silence the most skeptical critics. In medical terms, the VIGOR results raised the question of
21 whether selective inhibition of COX-2 was a monumental mistake from the start. While the
22 NSAID risks to the GI system were real and sometimes fatal, they were dwarfed by the
23 cardiovascular risks of the arthritis population that needed these drugs on a daily basis. All
24 makers of NSAIDs, including Defendants, were aware of these results.

25 **c. APPROVe**

26 55. Anxious to put safety questions surrounding Vioxx to rest, Merck designed
27 another large scale trial, Adenomatous Polyp Prevention (APPROVe), which was intended to test
28 the drug's ability to prevent or shrink colon polyps, but would also compare the cardiovascular

1 safety of Vioxx to a placebo control. According to the analysis conducted by Public Citizen of
2 the APPROVe data: Vioxx “doubled the risk of any thrombotic cardiovascular event” and
3 “doubled the risk of MI (myocardial infarction a/k/a heart attack)¹. *Public Citizen*, January 24,
4 2005, at 15. Despite the available CELEBREX data and other information related to Vioxx,
5 PFIZER never paused to reevaluate the CELEBREX data and studies.

6 56. The scientific data available during and after CELEBREX’s approval
7 process made clear to Defendants that their formulation of CELEBREX would cause a higher risk
8 of blood clots, heart attack and/or myocardial infarctions among CELEBREX consumers, alerting
9 them to the need to do additional and adequate safety studies.

10 57. As stated by Dr. Topol on October 21, 2004, in *The New England Journal*
11 *of Medicine*, outlining Defendants’ failure to have conducted the necessary trials before
12 marketing to humans “it is mandatory to conduct a trial specifically assessing cardiovascular risk
13 and benefit of (COX-2 inhibitors). Such a trial needed to be conducted in patients with
14 established coronary artery disease, who frequently have coexisting osteoarthritis requiring
15 medication and have the highest risk of further cardiovascular events.”

16 58. Dr. Topol was also the author on the study published in August 2001 in
17 JAMA (listed above) that reported an increased risk of thrombotic cardiovascular events in
18 persons who used COX-2 inhibitors.

19 59. Based upon readily available scientific data, Defendants knew, or should
20 have known, that their pre-approval testing of CELEBREX did not adequately represent the
21 cross-section of individuals who were intended consumers and therefore, likely to take
22 CELEBREX. Therefore, Defendants’ testing and studies were grossly inadequate.

23 60. Had Defendants done adequate testing prior to approval and market launch,
24 rather than the extremely short duration studies done on the small size patient base that was
25

26 ¹ Although Merck claims that the two-fold risk of heart attacks and heart attacks seen in the
27 APPROVe trial did not emerge until after patients had been taking the drug for 18 months, closer
28 analysis indicates that significant increase in risk of heart attack was evident in as little as 4
months time.

1 actually done, the Defendants' scientific data would have revealed significant increases in
2 incidence of heart attacks and myocardial infarctions among the intended and targeted population
3 of CELEBREX consumers. Adequate testing would have shown that CELEBREX possessed
4 serious side effects. Defendants should have taken appropriate measures to ensure that their
5 defectively designed product would not be placed in the stream of commerce and/or should have
6 provided full and proper warnings accurately and fully reflecting the scope and severity of
7 symptoms of those side effects should have been made.

8 61. In fact, post-market approval data did reveal increased risks of clotting,
9 heart attack and myocardial infarction, but Defendants intentionally suppressed this information
10 in order for them to gain significant profits from continued CELEBREX sales.

11 62. Defendants' failure to conduct adequate testing and/or additional testing
12 prior to market launch was based upon their desire to generate maximum financial gains for
13 themselves and to gain a significant market share in the lucrative multi-billion dollar COX-2
14 inhibitor market.

15 63. At the time Defendants manufactured, advertised, and distributed
16 CELEBREX to consumers, Defendants intentionally or recklessly ignored and/or withheld
17 information regarding the increased risks of hypertension, heart attack and/or myocardial
18 infarctions because Defendants knew that if such increased risks were disclosed, consumers
19 would not purchase CELEBREX, but instead would purchase other cheaper and safer NSAIDs.

20 **E. Facts Regarding Defendants' Marketing And Sale Of CELEBREX**

21 64. Such an ineffective and unreasonably dangerous drug could only be widely
22 prescribed as a result of a tremendous marketing campaign. In addition to being aggressive, the
23 Defendants' marketing campaign was fraudulent and misleading. But for fraudulent and
24 misleading advertising, consumers, including the Plaintiff, would not have purchased
25 CELEBREX, a more costly prescriptive drug, ineffective for its intended purposes.

26 65. Defendant's marketing was so fraudulent that the FDA issued three
27 Warning Letters to Defendants in October 1999, April 2000, and November 2000, all finding that
28

1 Defendants were unlawfully making false or misleading statements concerning the safety and/or
2 efficacy of CELEBREX. The November letter cited two direct-to-consumer television
3 advertisements that overstated the efficacy of CELEBREX. The FDA ordered that SEARLE
4 immediately cease distribution of the misleading ads.

5 66. On February 2001, the FDA issued a Warning Letter to PHARMACIA
6 stating that promotional activities from marketing CELEBREX were unlawful because they were
7 “false, lacking in fair balance, or otherwise misleading.” The FDA found that CELEBREX had
8 been promoted for unapproved uses, in unapproved dosing regimens, and that the marketers had
9 made unsupportable claims that CELEBREX was safer and more effective than other NSAIDs.

10 67. In August 2001, it was revealed that PHARMACIA had misrepresented the
11 results of a post-marketing clinical study of CELEBREX when submitting it for publication.
12 PHARMACIA selectively omitted portions of the data relating to adverse effects. The
13 *Washington Post* reported on August 5, 2001 that, “the study had lasted a year, not six months as
14 . . . thought. Almost all of the ulcer complications that occurred during the second half of the
15 study were in CELEBREX users. When all of the data were considered, most of CELEBREX’s
16 apparent safety advantage[as compared to traditional NSAIDs] disappeared.”

17 68. On January 10, 2005 the FDA again issued PFIZER a written reprimand
18 for its promotional activities. The reprimand reads: “These five promotional pieces
19 [3 CELEBREX and 2 Bextra] variously: omit material facts . . . and make misleading safety,
20 unsubstantiated superiority, and unsubstantiated effectiveness claims.” Amid continued
21 frustration with PFIZER’s continually misleading marketing strategy and ever surmounting
22 evidence of cardiovascular dangers, the FDA Advisory Panel voted overwhelmingly that the
23 company should never again advertise the drug [CELEBREX].”

24 69. At all times relevant herein, Defendants engaged in a marketing campaign
25 with the intent that consumers would perceive CELEBREX as a safer and better drug than its
26 other NSAIDs and, therefore, purchase CELEBREX.

27 70. Defendants widely and successfully marketed CELEBREX throughout the
28

1 United States by, among other things, conducting promotional campaigns that misrepresented the
2 efficacy of CELEBREX in order to induce a widespread use and consumption. CELEBREX was
3 represented to aid the pain and discomfort of arthritis, osteoarthritis, and related problems.

4 Defendants made misrepresentations by means of media advertisements, and statements
5 contained in sales literature provided to Plaintiff's prescribing physicians.

6
7 71. Despite knowledge of the dangers presented by CELEBREX, Defendants
8 and Defendants' predecessors in interest, through their officers, directors and managing agents for
9 the purpose of increasing sales and enhancing its profits, knowingly and deliberately failed to
10 remedy the known defects of CELEBREX and failed to warn the public, including Plaintiff, of
11 the serious risk of injury occasioned by the defects inherent in CELEBREX. Defendants and
12 their officers, agents and managers intentionally proceeded with the inadequate safety testing, and
13 then the manufacturing, sale and marketing of CELEBREX, knowing that persons would be
14 exposed to serious potential danger, in order to advance their own pecuniary interests.
15 Defendants' conduct was wanton and willful, and displayed a conscious disregard for the safety
16 of the public and particularly of Plaintiff.

17 72. In an elaborate and sophisticated manner, Defendants aggressively
18 marketed CELEBREX directly to consumers and medical professionals (including physicians and
19 leading medical scholars) in order to leverage pressure on third party payors, medical care
20 organizations, and large institutional buyers (*e.g.*, hospitals) to include CELEBREX on their
21 formularies. Faced with the increased demand for the drug by consumers and health care
22 professionals that resulted from Defendants' successful advertising and marketing blitz, third
23 party payors were compelled to add CELEBREX to their formularies. Defendants' marketing
24 campaign specifically targeted third party payors, physicians, and consumers, and was designed
25 to convince them of both the therapeutic and economic value of CELEBREX.

26 73. Defendants represented that CELEBREX was similar to ibuprofen and
27 naproxen but was superior because it lacked any of the common gastrointestinal adverse side
28 effects associated with these and other non-steroidal anti-inflammatory drugs ("NSAIDS").

1 Defendants promoted CELEBREX as a safe and effective alternative that would not have the
2 same deleterious and painful impact on the gut, but that would be just as effective, if not more so,
3 for pain relief.

4 74. Yet, CELEBREX possessed dangerous and concealed or undisclosed side
5 effects, including the increased risk of serious cardiovascular events, such as heart attacks,
6 unstable angina, cardiac clotting, deep vein thrombosis, hypertension, and cerebrovascular events,
7 such as heart attacks. In addition, CELEBREX, which is significantly more expensive than
8 traditional NSAIDs², was actually was no more effective than traditional and less expensive
9 NSAIDs and, just like traditional NSAIDs, carried a risk of perforations, ulcers, and
10 gastrointestinal bleeding. Yet, Defendants chose not to warn about these risks and dangers.

11 75. Defendants knew of these risks before the U.S. Food and Drug
12 Administration (the "FDA") approved CELEBREX for sale, but Defendants ignored,
13 downplayed, suppressed, omitted, and concealed these serious safety risks and denied inefficacy
14 in its promotion, advertising, marketing, and sale of CELEBREX. Defendants' omission,
15 suppression, and concealment of this important information enabled CELEBREX to be sold to,
16 and purchased, or paid for by, the Consumers at a grossly inflated price.

17 76. Consequently, CELEBREX captured a large market share of anti-
18 inflammatory drugs prescribed for and used by patients. In 2004 alone, sales of CELEBREX
19 exceeded \$2 billion, despite the significantly higher cost of CELEBREX as compared to other
20 pain relievers in the same family of drugs.

21 77. Because Defendants engaged in a promotional and marketing campaign
22 that featured an advertising blitz directly targeted to consumers, that touted CELEBREX as a
23 safer drug than other drugs in its class, while uniformly failing to disclose the health risks of
24 CELEBREX, Defendants were able to justify pricing CELEBREX significantly higher than the
25 cost of generic aspirin. In reality, that price inflation was not justified. Had Defendants disclosed
26 the truth about CELEBREX, Defendants would not and could not have reaped the billions of
27

28 ² The cost of Celebrex is at least \$3-\$6 per day, while an over-the-counter NSAID can cost \$.50 or less per day.

1 dollars in CELEBREX sales that were achieved as a direct result of the concealment, omission,
2 suppression, and obfuscation of the truth.

3 78. The Defendants intentionally, deliberately, knowingly, and actively
4 concealed, omitted, suppressed, and obfuscated important and material information regarding the
5 risks, dangers, defects, and disadvantages of CELEBREX from Plaintiff, the public, the medical
6 community, and the regulators. This concealment and omission was deliberate, knowing, active,
7 and uniform, was intended to induce and maximize sales and purchases of CELEBREX, and
8 prevented Plaintiff from obtaining all the material information that would be important to her
9 decision as a reasonable person to purchase, pay for, and/or use CELEBREX.

10 79. Defendants' systematic, active, knowing, deliberate, and uniform
11 concealment, omissions, suppression, and conduct caused Plaintiff to purchase, pay for, and/or
12 use CELEBREX; and caused Plaintiff's losses and damages as asserted herein.

13 80. Had Defendants done adequate testing prior to approval and "market
14 launch," the defendants' scientific data would have revealed significant increases in heart attack
15 and myocardial infarction amongst the intended population of CELEBREX consumers. Adequate
16 testing would have shown that CELEBREX possessed serious side effects. Defendants should
17 have taken appropriate measures to ensure that their defectively designed product would not be
18 placed in the stream of commerce and/or should have provided full and proper warnings
19 accurately and fully reflecting the scope and severity of symptoms of those side effects should
20 have been made.

21 81. In fact, post-market approval data did reveal increased risks of clotting,
22 heart attack and myocardial infarction, but Defendants intentionally suppressed this information
23 in order for them to gain significant profits from continued CELEBREX sales.

24 82. Defendants' failure to conduct adequate testing and/or additional testing
25 prior to "market launch," and active concealment and failure to warn the medical community and
26 general public of the known cardiovascular risks of CELEBREX was particularly negligent,
27 reckless and/or malicious given the drug's known target market. Defendants were well aware
28

1 that most patients taking CELEBREX are elderly and have higher risk of developing
2 cardiovascular risks to begin with. Nearly half of the patients with arthritis have coexisting
3 cardiovascular disease, and most patients, as discovered in the CLASS study, were prone to
4 higher dosing.

5 83. Defendants' failure to conduct adequate testing and/or additional testing
6 prior to "market launch" was based upon their desire to generate maximum financial gains for
7 themselves and to gain a significant market share in the lucrative multi-billion dollar COX-2
8 inhibitor market.

9 84. At the time Defendants manufactured, advertising, and distributed
10 CELEBREX to consumers including Plaintiff, Defendants intentionally or recklessly ignored
11 and/or withheld information regarding the increased risks of hypertension, heart attack and/or
12 myocardial infarctions because Defendants knew that if such increased risks were disclosed,
13 consumers would not purchase CELEBREX, but instead would purchase other cheaper and safer
14 NSAID drugs.

15 **CLAIMS FOR RELIEF**

16 **FIRST CLAIM FOR RELIEF**

17 **Negligence**

18 85. Plaintiff incorporates by reference all of the paragraphs of this Complaint
19 as if fully set forth herein.

20 86. Defendants owed Plaintiff a duty to exercise reasonable care when
21 designing, manufacturing, marketing, advertising, distributing, and selling CELEBREX. This
22 duty included the duty not to introduce a pharmaceutical drug, such as CELEBREX, into the
23 stream of commerce that caused users to suffer from unreasonable, dangerous or untoward
24 adverse side effects.

25 87. At all relevant times to this action, Defendants owed a duty to properly
26 warn Plaintiff and the Public of the risks, dangers and adverse side effects of their pharmaceutical
27 drug CELEBREX.

28 88. Defendants breached their duties by failing to exercise ordinary care in the

1 preparation, design, research, testing, development, manufacturing, inspection, labeling,
2 marketing, promotion, advertising and selling of CELEBREX, including:

3 (a) failing to use due care in the preparation and development of
4 CELEBREX to prevent the aforementioned risk of injuries to individuals when the drugs were
5 ingested;

6 (b) failing to use due care in the design of CELEBREX to prevent the
7 aforementioned risk of injuries to individuals when the drugs were ingested;

8 (c) failing to conduct adequate pre-clinical testing and research to
9 determine the safety of CELEBREX;

10 (d) failing to conduct adequate post-marketing surveillance and
11 exposure studies to determine the safety of CELEBREX;

12 (e) failing to completely, accurately and in a timely fashion, disclose
13 the results of the pre-marketing testing and post-marketing surveillance and testing to Plaintiff,
14 consumers, the medical community, and the FDA;

15 (f) failing to accompany CELEBREX with proper warnings regarding
16 all possible adverse side effects associated with the use of CELEBREX;

17 (g) failing to use due care in the manufacture, inspection, and labeling
18 of CELEBREX to prevent the aforementioned risk of injuries to individuals who used
19 CELEBREX;

20 (h) failing to use due care in the promotion of CELEBREX to prevent
21 the aforementioned risk of injuries to individuals when the drugs were ingested;

22 (i) failing to use due care in the sale and marketing of CELEBREX to
23 prevent the aforementioned risk of injuries to individuals when the drugs were ingested;

24 (j) failing to use due care in the selling of CELEBREX to prevent the
25 aforementioned risk of injuries to individuals when the drugs were ingested;

26 (k) failing to provide adequate and accurate training and information to
27 the sales representatives who sold CELEBREX;
28

1 (l) failing to provide adequate and accurate training and information to
2 healthcare providers for the appropriate use of CELEBREX; and

3 (m) being otherwise reckless, careless and/or negligent.

4 89. Despite the fact that Defendants knew or should have known that
5 CELEBREX caused unreasonable and dangerous side effects which many users would be unable
6 to remedy by any means, Defendants continued to promote and market CELEBREX to
7 consumers, including Plaintiff, when safer and more effective methods of pain relief were
8 available.

9 90. Defendants were, or should have been had they exercised reasonable care,
10 in possession of evidence demonstrating that CELEBREX caused serious side effects.
11 Nevertheless, they continued to market their products by providing false and misleading
12 information with regard to the safety and efficacy of CELEBREX.

13 91. Defendants knew or should have known that consumers such as Plaintiff
14 would foreseeably suffer injuries as a result of their failure to exercise ordinary care as described
15 above.

16 92. As a direct and proximate consequence of Defendants' acts, omissions, and
17 misrepresentations described herein, the Plaintiff, sustained serious cardiovascular injuries; has
18 required and will require healthcare and services; has incurred and will continue to incur medical
19 and related expenses; has suffered loss of wages and a diminished capacity to earn wages in the
20 future; has suffered and will continue to suffer mental anguish, diminished capacity for the
21 enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of
22 preexisting conditions and activation of latent conditions, and other such damages. Plaintiff's
23 direct medical losses and costs include care for hospitalization, physician care, monitoring,
24 treatment, medications, and supplies. Plaintiff will continue to incur such losses in the future.

25 93. Defendants' conduct was committed with knowing, conscious, wanton,
26 willful, and deliberate disregard for the value of human life and the rights and safety of
27 consumers, including Plaintiff, thereby entitling Plaintiff to punitive and exemplary damages so
28

1 as to punish Defendants and deter them from similar conduct in the future.

2 94. Plaintiff's spouse, MARIA MARTINEZ-GOMES, sustained a loss of
3 consortium as a result of the injuries and damages sustained by Plaintiff incident to the use of
4 CELEBREX. Plaintiff's spouse's damages include, but are not limited to, a loss of society,
5 companionship, services, support, and care. All such losses are permanent and continuing in
6 nature.

7 95. WHEREFORE, Plaintiff demands judgment against Defendants and seeks
8 compensatory damages, and exemplary and punitive damages together with interest, the costs of
9 suit and attorneys' fees and such other and further relief as this Court deems just and proper.

10 **SECOND CLAIM FOR RELIEF**

11 **Strict Liability**

12 96. Plaintiff incorporates by reference all previous paragraphs of this
13 Complaint as if fully set forth herein and further alleged as follows:

14 97. At all times relevant to this action, Defendants were suppliers of
15 CELEBREX, placing the drug into the stream of commerce. CELEBREX was expected to and
16 did reach Plaintiff without substantial change in the condition in which it was manufactured and
17 sold.

18 98. CELEBREX was unsafe for normal or reasonably anticipated use.

19 99. CELEBREX was defective in design or formulation because when it left
20 the hands of the manufacturer and/or supplier, it was unreasonably dangerous and more
21 dangerous than an ordinary consumer would expect. CELEBREX was also defective and
22 unreasonably dangerous in that the foreseeable risk of injuries from CELEBREX exceeded the
23 benefits associated with the design and/or formulation of the product.

24 100. CELEBREX is unreasonably dangerous: (a) in construction or
25 composition; (b) in design; (c) because an adequate warning about the product was not provided;
26 (d) because it does not conform to an express warranty of the manufacturer about the product .

27 101. CELEBREX as manufactured and supplied by Defendants was also
28 defective due to inadequate warnings, and/or inadequate clinical trials, testing and study, and

1 inadequate reporting regarding the results of the clinical trials, testing and study. Defendants
2 failed to perform adequate testing before exposing Plaintiff to the medication, testing which
3 would have shown that CELEBREX had the potential to cause serious side effects including the
4 injuries suffered like the Plaintiff.

5 102. CELEBREX as manufactured and supplied by Defendants was defective
6 due to inadequate post-marketing warnings or instructions because, after Defendants knew or
7 should have known of the risk of injuries from CELEBREX, they failed to provide adequate
8 warnings to the medical community and the consumers, to whom they were directly marketing
9 and advertising CELEBREX; and, further, it continued to affirmatively promote CELEBREX as
10 safe and effective.

11 103. CELEBREX was manufactured, distributed, tested, sold, marketed,
12 advertised and promoted defectively by Defendants, and as a direct and proximate cause of
13 Defendants' defective design of CELEBREX, Plaintiff used CELEBREX rather than other safer
14 and cheaper NSAIDs. As a result, Plaintiff suffered the personal injuries described herein.

15 104. Information given by Defendants to the medical community and to the
16 consumers concerning the safety and efficacy of CELEBREX, especially the information
17 contained in the advertising and promotional materials, did not accurately reflect the potential
18 side effects of CELEBREX.

19 105. Had adequate warnings and instructions been provided, Plaintiff would not
20 have taken CELEBREX, and would not have been at risk of the harmful side effects described
21 herein.

22 106. Defendants acted with conscious and deliberate disregard of the
23 foreseeable harm caused by CELEBREX.

24 107. Plaintiff could not, through the exercise of reasonable care, have
25 discovered CELEBREX's defects or perceived the dangers posed by the drug.

26 108. As a direct and proximate consequence of Defendants' acts, omissions, and
27 misrepresentations described herein, the Plaintiff, sustained serious cardiovascular injuries; has
28

1 required and will require healthcare and services; has incurred and will continue to incur medical
2 and related expenses; has suffered loss of wages and a diminished capacity to earn wages in the
3 future; has suffered and will continue to suffer mental anguish, diminished capacity for the
4 enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of
5 preexisting conditions and activation of latent conditions, and other such damages. Plaintiff's
6 direct medical losses and costs include care for hospitalization, physician care, monitoring,
7 treatment, medications, and supplies. Plaintiff will continue to incur such losses in the future.

8 109. Defendants' conduct was committed with knowing, conscious, wanton,
9 willful, and deliberate disregard for the value of human life and the rights and safety of
10 consumers, including Plaintiff, thereby entitling Plaintiff to punitive and exemplary damages so
11 as to punish Defendants and deter them from similar conduct in the future.

12 WHEREFORE, Plaintiff demands judgment against Defendants and seeks
13 compensatory damages, and punitive and exemplary damages together with interest, the costs of
14 suit and attorneys' fees and such other and further relief as this Court deems just and proper.

15 **THIRD CLAIM FOR RELIEF**
16 **Breach of Express Warranty**

17 110. Plaintiff incorporates by reference all of the paragraphs of this Complaint
18 as if fully set forth herein.

19 111. Defendants expressly represented to Plaintiff and other consumers and the
20 medical community that CELEBREX was safe and fit for its intended purposes, that it was of
21 merchantable quality, that it did not produce any dangerous side effects, particularly any
22 unwarned-of side effects, and that it was adequately tested.

23 112. These warranties came in the form of:

24 (a) Defendants' public written and verbal assurances of the safety and
25 efficacy of CELEBREX;

26 (b) Press releases, interviews and dissemination via the media of
27 promotional information, the sole purpose of which was to create an increased demand for
28 CELEBREX, which failed to warn of the risk of injuries inherent to the ingestion of CELEBREX,

1 especially to the long-term ingestion of CELEBREX;

2 (c) Verbal and written assurances made by Defendants regarding
3 CELEBREX and downplaying the risk of injuries associated with the drug;

4 (d) False and misleading written information, supplied by Defendants,
5 and published in the Physician's Desk Reference on an annual basis, upon which physicians
6 relied in prescribing CELEBREX during the period of Plaintiff's ingestion of CELEBREX, and;

7 (e) advertisements.

8 113. The documents referred to above were created by and at the direction of
9 Defendants.

10 114. Defendants knew or had reason to know that CELEBREX did not conform
11 to these express representations in that CELEBREX is neither as safe nor as effective as
12 represented, and that CELEBREX produces serious adverse side effects.

13 115. CELEBREX did not and does not conform to Defendants' express
14 representations because it is not safe, has numerous and serious side effects, including unwarned-
15 of side effects, and causes severe and permanent injuries.

16 116. Plaintiff, other consumers, and the medical community relied upon
17 Defendants' express warranties.

18 117. As a direct and proximate consequence of Defendants' acts, omissions, and
19 misrepresentations described herein, the Plaintiff, sustained serious cardiovascular injuries; has
20 required and will require healthcare and services; has incurred and will continue to incur medical
21 and related expenses; has suffered loss of wages and a diminished capacity to earn wages in the
22 future; has suffered and will continue to suffer mental anguish, diminished capacity for the
23 enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of
24 preexisting conditions and activation of latent conditions, and other such damages. Plaintiff's
25 direct medical losses and costs include care for hospitalization, physician care, monitoring,
26 treatment, medications, and supplies. Plaintiff will continue to incur such losses in the future.

27 118. Defendants' conduct was committed with knowing, conscious, wanton,
28

1 willful, and deliberate disregard for the value of human life and the rights and safety of
2 consumers, including Plaintiff, thereby entitling Plaintiff to punitive and exemplary damages so
3 as to punish Defendants and deter them from similar conduct in the future.

4 119. WHEREFORE, Plaintiff demands judgment against Defendants and seeks
5 compensatory damages, and punitive and exemplary damages together with interest, the costs of
6 suit and attorneys' fees and such other and further relief as this Court deems just and proper.

7
8 **FOURTH CLAIM FOR RELIEF**
Breach of Implied Warranty

9 120. Plaintiff incorporates by reference all of the paragraphs of this Complaint
10 as if fully set forth herein.

11 121. Defendants manufactured, distributed, advertised, promoted, and sold
12 CELEBREX.

13 122. At all relevant times, Defendants knew of the use for which CELEBREX
14 was intended and impliedly warranted the product to be of merchantable quality and safe and fit
15 for such use.

16 123. CELEBREX was not of merchantable quality and was not fit for its
17 intended use, because it causes increased risk of serious cardiovascular and cerebrovasclar
18 adverse events, including heart attacks, heart attacks and other serious and harmful adverse health
19 effects.

20 124. Defendants breached the implied warranty that CELEBREX was of
21 merchantable quality and fit for such use in violation of Md. Code Ann., Com. Law § 2-314, *et*
22 *seq.*

23 125. Defendants were aware that consumers, including Plaintiff, would use
24 CELEBREX for treatment of pain and inflammation and for other purposes.

25 126. Plaintiff and the medical community reasonably relied upon Defendants'
26 judgment and expertise to only sell them or allow them to prescribe CELEBREX only if it was
27 indeed of merchantable quality and safe and fit for its intended use. Consumers, including
28

1 Plaintiff, and the medical community, reasonably relied upon Defendants' implied warranty for
2 CELEBREX.

3 127. CELEBREX reached consumers, including Plaintiff, without substantial
4 change in the condition in which it was manufactured and sold by Defendants.

5 128. Defendants breached their implied warranty to consumers, including
6 Plaintiff; CELEBREX was not of merchantable quality or safe and fit for its intended use.

7 129. As a direct and proximate consequence of Defendants' acts, omissions, and
8 misrepresentations described herein, the Plaintiff, sustained serious cardiovascular injuries; has
9 required and will require healthcare and services; has incurred and will continue to incur medical
10 and related expenses; has suffered loss of wages and a diminished capacity to earn wages in the
11 future; has suffered and will continue to suffer mental anguish, diminished capacity for the
12 enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of
13 preexisting conditions and activation of latent conditions, and other such damages. Plaintiff's
14 direct medical losses and costs include care for hospitalization, physician care, monitoring,
15 treatment, medications, and supplies. Plaintiff will continue to incur such losses in the future.

16 130. Defendants' conduct was committed with knowing, conscious, wanton,
17 willful, and deliberate disregard for the value of human life and the rights and safety of
18 consumers, including Plaintiff, thereby entitling Plaintiff to punitive and exemplary damages so
19 as to punish Defendants and deter them from similar conduct in the future.

20 131. WHEREFORE, Plaintiff demands judgment against Defendants and seeks
21 compensatory damages and punitive and exemplary damages together with interest, the costs of
22 suit and attorneys' fees, and such other and further relief as this Court deems just and proper.

23 **FIFTH CLAIM FOR RELIEF:**
24 **Fraudulent Misrepresentation & Concealment**

25 132. Plaintiff incorporates by reference all of the paragraphs of this Complaint
26 as if fully set forth herein.

27 133. Defendants' superior knowledge and expertise, their relationship of trust
28

1 and confidence with doctors and the public, their specific knowledge regarding the risks and
2 dangers of CELEBREX, and their intentional dissemination of promotional and marketing
3 information about CELEBREX for the purpose of maximizing its sales, each gave rise to the
4 affirmative duty to meaningfully disclose and provide all material information about
5 CELEBREX's risks and harms to doctors and consumers.

6 134. Defendants made fraudulent affirmative misrepresentations with respect to
7 CELEBREX in the following particulars:

8 (a) Defendants represented through their labeling, advertising,
9 marketing materials, detail persons, seminar presentations, publications, notice letters, and
10 regulatory submissions that CELEBREX had been tested and found to be safe and effective for
11 the treatment of pain and inflammation; and

12 (b) Defendants represented that CELEBREX was safer than other
13 alternative medications.

14 135. Defendants made affirmative misrepresentations; and fraudulently,
15 intentionally and/or recklessly concealed material adverse information regarding the safety and
16 effectiveness of CELEBREX.

17 136. Defendants made these misrepresentations and actively concealed adverse
18 information at a time when Defendants knew or had reason to know that CELEBREX had defects
19 and was unreasonably dangerous and was not what Defendants had represented to the medical
20 community, the FDA and the consuming public, including Plaintiff.

21 137. Defendants omitted, suppressed and/or concealed material facts concerning
22 the dangers and risk of injuries associated with the use of CELEBREX including, but not limited
23 to, the cardiovascular, cerebrovascular, and other serious health risks. Furthermore, Defendants'
24 purpose was willfully blind to, ignored, downplayed, avoided, and/or otherwise understated the
25 serious nature of the risks associated with the use of CELEBREX in order to increase its sales.

26 138. The representations and concealment were undertaken by Defendants with
27 an intent that doctors and patients, including Plaintiff, rely upon them.
28

1 139. Defendants' representations and concealments were undertaken with the
2 intent of defrauding and deceiving Plaintiff, other consumers, and the medical community to
3 induce and encourage the sale of CELEBREX.

4 140. Defendants' fraudulent representations evinced their callous, reckless,
5 willful, and depraved indifference to the health, safety, and welfare of consumers, including
6 Plaintiff.

7 141. Plaintiff's physician and Plaintiff relied on and were induced by
8 Defendants' misrepresentations, omissions, and/or active concealment of the dangers of
9 CELEBREX in selecting CELEBREX treatment.

10 142. Plaintiff and the treating medical community did not know that the
11 representations were false and were justified in relying upon Defendants' representations.

12 143. Had Plaintiff been aware of the increased risk of side effects associated
13 with CELEBREX and the relative efficacy of CELEBREX compared with other readily available
14 medications, Plaintiff would not have taken CELEBREX as she did.

15 144. As a direct and proximate consequence of Defendants' acts, omissions, and
16 misrepresentations described herein, the Plaintiff, sustained serious cardiovascular injuries; has
17 required and will require healthcare and services; has incurred and will continue to incur medical
18 and related expenses; has suffered loss of wages and a diminished capacity to earn wages in the
19 future; has suffered and will continue to suffer mental anguish, diminished capacity for the
20 enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of
21 preexisting conditions and activation of latent conditions, and other such damages. Plaintiff's
22 direct medical losses and costs include care for hospitalization, physician care, monitoring,
23 treatment, medications, and supplies. Plaintiff will continue to incur such losses in the future.

24 145. Defendants' conduct was committed with knowing, conscious, wanton,
25 willful, and deliberate disregard for the value of human life and the rights and safety of
26 consumers, including Plaintiff, thereby entitling Plaintiff to punitive and exemplary damages so
27 as to punish Defendants and deter them from similar conduct in the future.
28

1 146. WHEREFORE, Plaintiff demands judgment against Defendants and seeks
2 compensatory damages, and punitive and exemplary damages together with interest, the costs of
3 suit and attorneys' fees, and such other and further relief as this Court deems just and proper.

4 **SIXTH CLAIM FOR RELIEF**
5 **(Unjust Enrichment)**

6 147. Plaintiff incorporates by reference all previous paragraphs of this
7 Complaint as if fully set forth herein.

8 148. At all times relevant to this action, Defendants were the manufacturers,
9 sellers, and/or suppliers of CELEBREX.

10 149. Plaintiff paid for CELEBREX for the purpose of managing her pain safely
11 and effectively.

12 150. Defendants have accepted payment from Plaintiff for the purchase of
13 CELEBREX.

14 151. Plaintiff did not received the safe and effective pharmaceutical product for
15 which she paid.

16 152. It is inequitable and unjust for Defendants to retain this money because the
17 Plaintiff did not in fact receive the product Defendant represented CELEBREX to be.

18 153. WHEREFORE, Plaintiff demands judgment against Defendants and seeks
19 equitable relief, the costs of suit and attorneys' fees, and such other and further relief as this Court
20 deems just and proper.

21 **SEVENTH CLAIM FOR RELIEF**
22 **(Violations of State Consumer Fraud and Deceptive Trade Practices Acts)**

23 154. Plaintiff incorporates by reference the preceding paragraphs as if they were
24 fully set forth herein.

25 155. Defendants had a statutory duty to refrain from unfair or deceptive acts or
26 practices in the sale and promotion of CELEBREX to Plaintiff.

27 156. Defendants engaged in unfair, unconscionable, deceptive, fraudulent and
28

1 misleading acts or practices in violation of all Puerto Rico's consumer protection laws, identified
2 below. Through its false, untrue and misleading promotion of CELEBREX, Defendants induced
3 Plaintiff to purchase and/or pay for the purchase of CELEBREX. Defendants misrepresented the
4 alleged benefits and characteristics of CELEBREX; suppressed, concealed and failed to disclose
5 material information concerning known adverse effects of CELEBREX; misrepresented the
6 quality of CELEBREX as compared to much lower-cost alternatives; misrepresented and
7 advertised that CELEBREX was of a particular standard, quality or grade that it was not;
8 misrepresented CELEBREX in such a manner that later, on disclosure of the true facts, there was
9 a likelihood that Plaintiff would have switched from CELEBREX to another NSAID and/or
10 chosen not to purchase and/or reimburse for purchases of CELEBREX; advertised CELEBREX
11 with the intent not to sell it as advertised; and otherwise engaged in fraudulent and deceptive
12 conduct.

13 157. Defendants' conduct created a likelihood of, and in fact caused, confusion
14 and misunderstanding. Defendants' conduct misled, deceived and damaged Plaintiff and
15 Defendants' fraudulent, misleading and deceptive conduct was perpetrated with an intent that
16 Plaintiff rely on said conduct by purchasing and/or paying for purchases of CELEBREX.
17 Moreover, Defendants knowingly took advantage of Plaintiff who was reasonably unable to
18 protect her interests due to ignorance of the harmful adverse effects of CELEBREX. Defendants'
19 conduct was willful, outrageous, immoral, unethical, oppressive, unscrupulous, unconscionable
20 and substantially injurious to Plaintiff and offends the public conscience.

21 158. Plaintiff purchased primarily for personal, family or household purposes.

22 159. As a result of Defendants' violative conduct, Plaintiff purchased and/or
23 paid for purchases of CELEBREX that were not made for resale.

24 160. Defendants engaged in unfair competition or deceptive acts or practices in
25 violation of HRS § 480-2, *et seq.*

26 161. As a proximate result of Defendants' misrepresentations and omissions,
27 Plaintiff and Plaintiff have suffered ascertainable losses, in an amount to be determined at trial.
28

1 162. Throughout the period described in this Complaint, Defendants repeatedly
2 engaged in intentional misconduct characterized by trickery, deceit and a wanton, willful,
3 conscious and reckless disregard of the health, rights and interests of the Plaintiff, and, in so
4 conducting itself, acted with oppression, fraud, and malice toward the Plaintiff. As a result of
5 Defendants' indifference to and reckless disregard of the health and safety of CELEBREX
6 patients, they suffered both physical and economic harm, and all end-payors incurred economic
7 damages. Accordingly, Defendants' conduct was highly reprehensible under controlling Supreme
8 Court punitive damages authority, and Plaintiff is entitled to punitive and/or exemplary damages.

9 163. As a direct and proximate consequence of Defendants' acts, omissions, and
10 misrepresentations described herein, the Plaintiff, sustained serious cardiovascular injuries; has
11 required and will require healthcare and services; has incurred and will continue to incur medical
12 and related expenses; has suffered loss of wages and a diminished capacity to earn wages in the
13 future; has suffered and will continue to suffer mental anguish, diminished capacity for the
14 enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of
15 preexisting conditions and activation of latent conditions, and other such damages. Plaintiff's
16 direct medical losses and costs include care for hospitalization, physician care, monitoring,
17 treatment, medications, and supplies. Plaintiff will continue to incur such losses in the future.

18 164. Defendants' conduct was committed with knowing, conscious, wanton,
19 willful, and deliberate disregard for the value of human life and the rights and safety of
20 consumers, including Plaintiff, thereby entitling Plaintiff to punitive and exemplary damages so
21 as to punish Defendants and deter them from similar conduct in the future.

22 165. WHEREFORE, Plaintiff demands judgment against Defendants and seeks
23 compensatory damages, and punitive and exemplary damages together with interest, the costs of
24 suit and attorneys' fees and such other and further relief as this Court deems just and proper.
25
26
27
28

PRAYER FOR RELIEF

WHEREFORE, Plaintiff requests the following relief:

1. General damages in excess of the jurisdictional amount of this Court;
2. Consequential damages;
3. Disgorgement of profits;
4. Restitution;
5. Punitive and exemplary damages;
6. Pre-judgment and post-judgment interest as provided by law;
7. Recovery of Plaintiff's costs including, but not limited to, discretionary Court costs of these causes, and those costs available under the law, as well as expert fees and attorneys' fees and expenses, and costs of this action; and
8. Such other and further relief as the Court deems just and proper.
